

Donor Benefits

Emergency services in Chester County are provided by highly-motivated and well-trained individuals who answer calls from their fellow citizens for “first-responder” assistance. The fundamental desire to help others is the cornerstone of all emergency services, but constant technological advances in equipment, communications, medical response, fire suppression and control of the scene of operations have placed a tremendous burden on our emergency responders. Your financial support for the Chester County Public Safety Training Foundation (CCPSTF) will help fund the creation of a state-of-the-art facility designed specifically to meet the varied skills training needs of our 5000-plus emergency responders including fire, police and EMS personnel living and working here in Chester County. Your support recognizes the sacrifices made by these brave individuals and also helps with recruiting additional “first-responders.”
